

Battle Creek CyberPatriot Summer Camps

Are you interested in cybersecurity and computers? Are you a beginner and would like to learn more about securing computers and networks? Or are you a computer whiz and up for a new challenge? If you are entering 7th - 12th grade this fall, the Battle Creek CyberPatriot Summer Camp is the perfect way to learn more about cybersecurity for free!

The [Battle Creek College Access Network](#) and the [110th Wing](#) of the Battle Creek Air National Guard Base in coordination with [MCISSE](#) are offering these 5-day summer camps.

WHEN:

- July 22-26 from 9AM-1PM: Standard AFA CyberCamp teaches beginner students the basics.
- July 29-August 2 from 9AM-1PM: Advanced AFA CyberCamp incorporates more complex concepts geared towards students who have attended a CyberCamp or participated on a CyberPatriot team.

WHERE: STARBASE at the Battle Creek Air National Guard Base, 3595 Mustang Avenue, Building 6909, Battle Creek, MI

WHAT YOU GET: T-shirt, workbook, light snacks, fun, and how to be safer on computers.

Campers do not need to have any special skill set to participate. For the Standard camp, some very basic knowledge of computer hardware (knowing how to use a mouse, start a monitor, can identify Windows start button icon, etc.) is helpful but not necessary. A basic English reading level is essential as many individual and group labs and activities are written directives and students must work alone and with small groups to accomplish tasks. The most important skill to possess is the passion to learn and a positive attitude!

Advanced campers need to have either participated in a previous camp or on a CyberPatriot Competition team.

For more information, contact Mike Segal at 269-962-2181 or mike@bccfoundation.org.
